

Get Your Pypes On

If there is one thing that is certain, we car enthusiasts spend a lot of time sitting in front of our computer screens contemplating our next purchase. We all know that we want to improve the performance of our car, but many times, we are uncertain whether the purchase we are considering will give us the results we are looking for. Such is the case when purchasing a performance exhaust system. Luckily for us, [Pypes Performance Exhaust](#) has given us a way to alleviate the worry.

Not only is an increase in performance a reason for an exhaust upgrade, but the sound of your car's exhaust has to be just right for you to be

happy. All too often, an exhaust is purchased because of a recommendation, and the end result is not what the car owner was hoping for—it's either too loud, or made no significant change. Pypes understands this situation, and has figured out how to help you get exactly what you want.

Pypes Performance Exhaust Corporate Passion Video

When you go to the Pypes web site, you can ultimately end up on the video page where they have dozens of videos of cars with a Pypes exhaust component installed. This takes the worry out of your exhaust selection, as you can hear the exhaust on a car much like yours. While they might not have your exact model of car listed, you can bet that the sound will still grab your attention and give you an idea of how great the exhaust will sound on your car.

1956 Chevy Exhaust System | Pypes SGC10SSR Polished...

It's not very often that you can hear what an upgrade will sound like on your car, but thanks to Pypes Exhaust, now you can.

The screenshot shows a web browser window displaying the Pypes Performance Exhaust website. The browser's address bar shows the URL pypesexhaust.com/pt-1545-videos.html. The website features a navigation menu on the left with the following items: Shows & Events, Pypes Openhouse, Customer Vehicles, Sponsored Vehicles, Video Gallery, and Submit Your Vehicle. Below the menu is a red button labeled "HAVE A QUESTION?" with a sub-link "Email Us Get Answers From Pros". There is also a "CHAT LIVE" button. The main content area is titled "Sound Check" and features a video player showing a white car in a garage. To the right of the video player is a list of supported vehicles:

- 2010-2013 Camaro
- 2008-2013 Challenger
- 2008-2009 G8
- 2006-2013 Charger
- 2005-2014 Mustang
- 2005-2006 GTO
- 1993-2002 F-Body
- 1979-2004 Mustang
- 1974-2009 Corvette
- 1967-1981 GM F-Body
- 1965-1978 Mustang
- 1964-1972 GTO
- 1964-1972 Chevelle
- 1955-1957 Chevy
- Jeep Trucks
- GM Trucks
- Ford Trucks
- Dodge Trucks

The website also includes a "Safe & Secure Shopping" section with logos for VISA, MasterCard, Discover, and PayPal, and a "Credit Card Merchant Services" section with logos for Authorize.net and COMODO. The Windows taskbar at the bottom shows the time as 9:30 AM on 7/20/2015.

So while you're sitting there behind the keyboard, check out Pypes' web site, and hear for yourself what your ride could sound like with a Pypes exhaust.
